Munich, Germany | +49 174 9194077 | [services@runlevel0.me](mailto:services@runlevel0.me) | [linkedin.com/in/eduardohki](https://linkedin.com/in/eduardohki) | [www.runlevel0.me](http://www.runlevel0.me)

## EXECUTIVE SUMMARY

Senior / Lead Platform Engineer with 10+ years of experience designing, building, and operating secure, scalable, and compliant cloud platforms for SaaS and regulated industries in Germany and Europe.

Strong focus on AWS multi-account environments, Kubernetes-based platforms, Infrastructure as Code, and Developer Experience (DevEx). I combine hands-on engineering with platform strategy, DevOps practices, and team enablement to support sustainable product delivery.

Known for bridging engineering execution with business, compliance, and reliability requirements, mentoring teams, and enabling organizations to scale their cloud platforms pragmatically.

Available for Freelance/Contract engagements in Germany and Europe (remote or hybrid).

## TECHNICAL SKILLS

**Platform & Cloud Engineering:** AWS (Organizations, Landing Zone, IAM Identity Center, CDK, CloudFormation, EKS, ECS, Fargate, Lambda, S3, DynamoDB, RDS, Aurora, Route 53, IAM), Kubernetes, Terraform, Helm, Pulumi, Docker, Serverless, Backup & Disaster Recovery, Cost Optimization

**Developer Enablement & DevEx:** CI/CD (GitHub Actions, GitLab CI), Infrastructure as Code, reusable platform components, documentation, workshops, golden paths

**Reliability, Security & Observability:** event-driven architectures, compliance-ready systems, Prometheus, Grafana, Loki, Datadog, New Relic, Trivy, SBOM, Dependency-Track

**Programming & Automation:** TypeScript, Node.js, Python, Elixir, Rust, SQL, Bash

**Methodologies:** Domain-Driven Design (DDD), Team Topologies, Trunk-Based Development, Continuous Delivery, Scrum, Kanban

## EXPERIENCE

### **Freelance Software & Cloud Engineer**

Feb 2024 – Present

*Munich, Germany*

- Cloud Architecture & Modernization:** Design and implementation of AWS-based SaaS solutions (multi-account, serverless, containerized) with emphasis on scalability, resilience, and compliance.
- Software Architecture & Development:** Delivery of SaaS platforms, backend services, and full-stack applications in TypeScript, Elixir, Rust and Python, ensuring maintainable and testable architectures (DDD, TDD).
- Team Enablement & Leadership:** Advisory on AWS strategy, DevOps integration, and engineering practices, complemented by team enablement through code reviews, workshops, and mentoring.
- Business Alignment:** Bridging of product vision with engineering execution through process streamlining and guidance on sustainable technology strategy.
- Technologies Used:** AWS (CDK, API Gateway, S3, DynamoDB, Lambda, EKS, ECS, Fargate), TypeScript, Node.js, Vitest, Hono.js, Cypress, Rust (Async/Tokio), Elixir, F#, GitHub, Claude, Terraform, Pulumi, Python, FastAPI

### **Elixir & Erlang Meetup Munich Organizer**

Aug 2024 – Present

*Munich, Germany*

- Organization and facilitation of community events to foster knowledge sharing around the Elixir, Erlang, and Gleam ecosystems, growing the BEAM community in Munich and enabling peer learning among engineers.

### **Lead Platform Engineer (Freelance Contract)**

Nov 2024 – Aug 2025

*Remote, Germany*

*Client from the Health Services Industry*

- Compliance & Resilience:** Designed and rolled out a multi-account AWS Backup & Recovery strategy (AWS Backup, Slack integration) with cross-region replication in Europe; implemented software supply-chain security with automated SBOM ingestion (GitHub Actions, Trivy Operator, Dependency-Track) and defined patching workflows for EKS/EC2 workloads.
- Event-Driven Architecture:** Led on-site workshops for team leads and wrote internal guidelines on event-driven communication patterns, enabling consistent adoption across product teams.
- Application & Platform Modernization:** Defined the migration strategy from legacy to next-generation EKS clusters; helped rationalize 100+ microservices to balance team autonomy with operational efficiency; streamlined Terraform code to reduce complexity and cost.

- Technologies Used:** AWS (Organizations, Landing Zone, IAM Identity Center, Backup, Security Hub, S3, Lambda, RDS, EKS, ECR, SQS, SNS, Bedrock, Cost Optimization), Kubernetes, Helm, Docker, Terraform, PostgreSQL, Python, Elixir, GitHub, Trivy, Dependency-Track, SBOM, Prometheus, Loki, Grafana, EventCatalog, Jira, Confluence

### Cloud Consultant (Freelance Contract, AWS CDK Focus)

*Client from the Credit Bureau Industry*

Mar 2024 – Oct 2024

Remote, Germany

- Cloud Modernization:** Migrated a SaaS product (Java Spring Boot, React) from Terraform to AWS CDK, making the infrastructure more maintainable and standardized.
- Team Enablement:** Guided a team of 4 developers to take full ownership of the application lifecycle through CDK best practices, code reviews, and pair programming.
- Architecture Advisory:** Supported Platform and Product teams with AWS CDK adoption and infrastructure design, strengthening delivery sustainability and productivity.
- Application Migration:** Improved the maintainability and resiliency of a TypeScript serverless application while extending its functionality during a cross-account migration.
- Technologies Used:** AWS (CDK, API Gateway, S3, Lambda, RDS, ECS, Fargate), TypeScript, Node.js, Terraform, PostgreSQL, OpenAPI, OAuth, GitHub, React, Java, SpringBoot, Jira, Confluence

### Lead Software Engineer

*SEMA GmbH*

Aug 2022 – Jan 2024

Wildpoldsried, Germany

- Led a team of 4 Software Engineers in building a new SaaS product for the Timber Construction industry, taking on responsibilities as Architect, Developer, and Scrum Master to ensure steady progress and delivery.
- Worked closely with stakeholders and product owners to clarify and prioritize requirements, guiding the team toward pragmatic and high-quality solutions.
- Built an event-driven file processing pipeline (S3 Events + Lambda) that automated file handling and streamlined system processing.
- Played a key role in the hiring process, actively participating in the selection of technical and leadership roles.
- Orchestrated comprehensive pair programming sessions and training programs on AWS, equipping the Engineering team with valuable skills and knowledge.
- Technologies Used:** AWS (CDK, API Gateway, S3, DynamoDB, Lambda, ECS, Fargate, Cost Optimization), TypeScript, Node.js, Rust (Async/Tokio), Poem-openapi, OpenAPI, OAuth, Azure DevOps, SAFe

### Principal Engineer

*PPRO Holding GmbH*

Nov 2021 – Jul 2022

Munich, Germany

- Supported reviews of Cloud Governance and Compliance in AWS, contributing expertise in security, scalability, and regulatory requirements.
- Designed and delivered an AWS Training Program in collaboration with the AWS Technical Customer Manager, used across the engineering organization.
- Contributed to the hiring of DevOps/Cloud Engineers and Team Leads, ensuring strong technical and cultural fit.
- Advocated for serverless adoption within engineering teams and represented the approach in cross-team technical discussions.
- Implemented a multi-account setup using AWS CDK and developed a robust CI/CD pipeline for efficient and reliable deployment of application changes.
- Delivered a serverless backend (CDK, TypeScript, AWS Lambda) for a UK merchant's transaction portal.
- Technologies Used:** AWS (CDK, API Gateway, Lambda, Kinesis, EKS, ECS, Fargate, CloudFormation), Serverless, TypeScript, JavaScript, Node.js, Cypress, Python, Docker, Terraform, Pulumi, Kubernetes, Helm, Docker, Elasticsearch/OpenSearch, GitLab, Okta, OAuth, Middy.js, Jira, Confluence

### Lead Cloud Consultant

*tecRacer GmbH & Co. KG*

Aug 2019 – Oct 2021

Munich, Germany

- Delivered technical and strategic consulting for AWS solutions across industries in Germany and Austria, including projects with regulatory requirements.
- Supported pre-sales as a Solutions Engineer and contributed to hiring new consultants.
- Built a serverless application with a state machine architecture, including PDF generation and email delivery (API Gateway, Lambda, DynamoDB, Elasticsearch/OpenSearch, Terraform).
- Led a migration from MS SQL Server to Amazon Aurora MySQL Serverless for SAP Commerce, resolving Unicode and performance issues while optimizing monitoring with New Relic.
- Directed the migration of a VMware Workspace ONE infrastructure to AWS Cloud for a German insurance company, including VM conversion to EC2, Jenkins pipelines, and an active-active multi-region setup with Route 53 for 300k+ simultaneous device connections.

- **Technologies Used:** AWS (CDK, API Gateway, Cloud Migration, Lambda, DynamoDB, Aurora, EKS, ECS, Fargate, CloudFormation, Cost Optimization), VMware, MS-SQL, Jenkins, TypeScript, JavaScript, Node.js, Python, Docker, Terraform, Kubernetes, Elasticsearch/OpenSearch, Jira, Confluence

**Senior DevOps Engineer** Jan 2018 – Jul 2019  
*Commerce Connector, now Wayvia* Stuttgart, Germany

- Maintained platform reliability, security and performance for global e-commerce SaaS.
- Implemented Prometheus for KPI monitoring and enhanced existing log management with Splunk.
- Supported Quality and Data Engineering teams with AWS Lambda and containerized infrastructure.
- **Technologies Used:** AWS (Lambda, Fargate, EC2, RDS, S3, CloudFront), Serverless Framework, Prometheus, Grafana, Splunk, Docker, Python, Node.js

**AWS Cloud Engineer** Mar 2017 – Dec 2017  
*Nuvme* Blumenau , Brazil

- Led multiple infrastructure migration projects to AWS, covering Web and ERP systems.
- **Technologies Used:** AWS (EC2, S3, IAM, Route 53, RDS), Docker, Grafana, Elasticsearch, Linux (RHEL, Ubuntu), MySQL, Python

**Linux & Open Source Consultant** Jan 2014 – Mar 2017  
*Indyxa Group (now )Flowti* Blumenau , Brazil

- Delivered infrastructure, monitoring and log management consulting for mission-critical environments, improving reliability and security.
- **Technologies Used:** Linux (RHEL, CentOS), Nagios, Graylog, Elasticsearch, VMware, Oracle DB, Python, Bash

**IT Support Analyst** Aug 2012 – Jan 2014  
*QuickSoft Sistemas de Informações* Blumenau , Brazil

- Provided enterprise infrastructure support, including data protection and automation of backup monitoring.
- **Technologies Used:** IBM TSM, Linux, VMware, Exchange Server

**IT Support Technician** Oct 2008 – Aug 2012  
*Advance Solution* Blumenau, Brazil

- Delivered IT infrastructure support for SMB clients, covering Windows Server, Active Directory, and networking.
- **Technologies Used:** Windows Server, Active Directory, Exchange, Hyper-V, Trend Micro

## EDUCATION

---

**Universidade Regional de Blumenau** Blumenau, Brazil  
*Computer Science Studies* Jul 2015 – Jul 2016

## COMMUNICATION SKILLS

---

**Languages:** Portuguese (native), English (fluent), German (advanced / professional working proficiency)
